TOTAL NOTES:

Elective(s) (

(1) These courses may be taken either semester in the first year.

(2) CA = Content Area in General Education (GenEd) Requirements (For current lists of GenEd courses, visit <u>http://geoc.uconn.edu</u>). These courses may be taken at any time.

4(6) (4) Prof. Req. (

15(6) TOTAL

3

14(6)

(3) All students must take either CE 3630 or 3640.

(4) Professional Requirements must be chosen to include at least one course from four of the following technical areas: Construction Management (CE 4210), Environmental/Sanitary (ENVE 3220 if also taken CE 3610, or ENVE 4310), Geotechnical (CE 4510 or 4541), Hydraulic/Water Resources (ENVE 4810 or 4820), Structural (CE 3630 or 3640), Surveying/Geodetic (CE 4410), and Transportation (CE 4580 or 4710 or 4720). The remaining two courses may be any course in engineering, mathematics or science not already used to satisfy another requirement or MGMT 5335 at the 2000-level or higher. See the next page for more details.

(5) The Science Elective must be taken from the courses listed on the next page (or an approved substitute).

(6) The credit totals for the last three semesters depend on how many structural design courses are chosen and when they are taken. If the second structural design class is selected as a professional requirement or if a 4 credit science elective is chosen, the number of free elective credits is reduced by one (each).

## PROFESSIONAL REQUIREMENTS AND SCIENCE ELECTIVE

The professional requirements are satisfied by eighteen (18) credits of 2000-level or higher courses in engineering, science or mathematics, including MGMT 5335. Following are specific restrictions on these courses:

**Proficiency in 4 CE Areas (12 Credits):** All CE students must take one course in each of the seven (7) technical areas listed in the table below as required courses. In addition, for the Professional Requirements, each student must take a second course from four of these areas listed as "Proficiency Courses". (F) and (S) indicates if the course is typically offered in the First or Second semester. Some are offered in alternate years as indicated.

<b>Technical Areas</b>	Required Courses	Proficiency Courses
	_	(4 required @ 1 each from 4 Different Areas)
Construction	CE 2210 or ENVE 2330 Decision	CE 4210 Operations Research in CEE (S)
Management	Analysis in CEE (F)	
Environmental	ENVE 2310 Environmental Engineering	ENVE 3220* Water Quality Engineering (S)
	Fundamentals (F)	or ENVE 4310 Environmental Modeling (S)
Geotechnical	CE 3510 Soil Mechanics (F)	CE 4510 Foundation Design (S – even )
		or CE 4530 Geoenvironmental Engr (S – odd)
		or CE 4541 Soil Mechanics II (F – even)

		or CE 4720 Highway Engr. – Design (S – odd)
		or CE 4750 Pavement Design (F - even)

\*ENVE 3220 is permitted for Professional Requirements only if CE 3610 was also taken.

\*\*To meet proficiency in the Structural area, the second of the two courses must be taken.

## Restrictions on the Remaining Six (6) Credits of Courses:

- CE 3520 Civil Engineering Materials (S) or ENVE 3200 Environmental Engineering Laboratory (S) may be used <u>only if the other was taken for the laboratory requirement</u>
- CE 3610 Basic Structural Analysis (S) or ENVE 3220 Water Quality Engineering (S) may be used <u>only if</u> the other was taken to meet CE requirements

#### Additional CE Courses that can be used for Professional Requirements:
